## **TRECODER® Backpack Directions**

- 1.) Fasten suction tube to TRECODER® gallon container.
- 2.) Hold Spot Gun even with or above the level of the gallon.
- 3.) Start pumping Spot Gun to fill and prime the systems. This will take about 30 - 40 strokes. If air bubbles develop while priming, hold Spot Gun above gallon container until air clears out of the system.
- 4.) Once the system is primed, put backpack on. Prime will remain as long as there is ink in the gallon container.
- 5.) Should prime be broken, repeat the above. Some reasons for loss of prime are: empty container, leak in hose connections, worn O-rings.
- 6.) For complete operating and maintenance instructions, refer to TRECODER® Spot Gun operating and maintenance sheet.
